Was ist ML? ☹ Unterschied Stat. Methoden, AI, ML, Deep Learning ☹ Begriffsklärung

Übersicht über ML-Gebiete:

Supervised, Unsupervised ☹ Unterschied gut herausarbeiten; Regr., Class. Vs. Clustering kurz erklären; Warum darlegen

Reinforcement Learning, Feature Engineering, Evolutionary Algorithms ☹ Nur sehr kurz / der Vollständigkeit halber

Regression? ☹ Bei ML heißt Regression eigentlich nur das Zielmenge Teil des $\mathbb{R}^n$ (bzw. metrischer Skala) ist eigentlich keine ML-Methoden?! ☹ Im Training überhaupt anbringen? Falls ja, welche Modelle?
